The Role of Radiologists in Major Sporting Events: The Olympics as a Model

by Prof. Bruce Forster

Update on MR Spine Imaging

by Prof. James F. Griffith

Speakers

Dr. Bruce Forster is Professor and Head at the University of British Columbia, Department of Radiology, and Regional Department Head and Medical Director, Diagnostic Imaging, Vancouver Coastal Health and Providence Health Care. He was recently Director of Diagnostic Imaging for the Vancouver 2010 Winter Olympics/Paralympics Games. As an Associate Member of the Allan McGavin Sports Medicine Centre, he has been involved in the clinical, education, and research aspects of sports imaging for 25 years, is Consultant to the Editor for the journal 'Radiology' and Associate Editor of the 'British Journal of Sports Medicine'. Dr. Forster has delivered over 300 invited lectures, many internationally, and has served as a Visiting Professor in Canada, the United States, Indonesia, Singapore, Japan, and the Middle East. He is the author of over 110 peer-reviewed scientific publications, and 100 educational exhibits, and has served as President of the Pacific Northwest Radiology Society, on the Board of Directors of the Canadian Association of Radiologists and is currently on the Board of Directors of the Canadian Radiologic Foundation. Dr. Forster is Lead Physician for 'Choosing Wisely Medical Imaging', one of the most comprehensive appropriateness initiatives in the Province, and serves as Chair of the CAR/CRF/UBC Radiology Leadership and Business Course, in collaboration with the Sauder School of Business.

James Griffith trained in Cork, Ireland and Birmingham, UK and is currently Professor and head of Musculoskeletal Imaging at the Department of Imaging and Interventional Radiology, Prince of Wales Hospital, The Chinese University of Hong Kong. He has published over 260 peer-reviewed full paper papers. He is currently the Asian Radiology Outreach Program Coordinator for the International Skeletal Society. His main current research areas are marrow changes in osteoporosis, particularly with respect to the pathophysiology and early diagnosis of osteoporosis, glenoid bone loss, osteochondral lesions of the talar dome and the imaging of bone architecture.
